National Flood Insurance Program V-70NE CERTIFICATE

Name: Donald S. Wingerter

Policy Number (Insurance Co. Use):

Building Address or Other Description: 136 S. Beach Blvd

City: Waveland

State: Mississippi

Zip Code: 39576

SECTION I: Flood Insurance Rate Map (FIRM) Information

Community Number: 285262 Panel Number: 28045C0363 Suffix:D Date of FIRM Index:10/16/09 FIRM Zone: VE24

SECTION II: Elevation Information

Note: This Certificate does not substitute for an Elevation Certificate

1. Elevation of the Bottom of Lowest Horizontal Structural Member......25.0 feet (NAVD88) 4. Approximate Depth of Anticipated Scour/Erosion used for Foundation Design....... 5.0 feet Embedment Depth of Pilings or Foundation Below Lowest Adjacent Grade...... 5.0 feet

> SECTION III: V-Zone Certification Statement Note: This section must be certified by a registered engineer or architect

I certify that I have developed or reviewed the structural design, plans, and specifications for construction and that the design and methods of construction to be used are in accordance with accepted standard of practice for meeting the following provisions:

- The bottom of the lowest horizontal structural member of the lowest floor (excluding piles and columns) is elevated to or above the BFE; and
- The pile and column foundation and structure attached thereto is anchored to resist flotation, collapse, and lateral movement due to the effects of the wind and water loads acting simultaneously on all building components. Water loading values used are those associated with the base flood. Wind loading values used are those required by the applicable State or local building code. The potential for scour and erosion at the foundation has been anticipated for conditions associated with the base flood, including wave action.

SECTION IV: Breakaway Wall Certification Statement Note: This section must be certified by a registered engineer or architect When breakaway walls exceed a design safe loading resistance of 20 pounds per square foot

I certify that I have developed or reviewed the structural design, plans, and specifications for construction and that the design and methods of construction to be used for the breakaway walls are in accordance with accepted standards of practice for meeting the following provisions:

- Breakaway wall collapse shall result from a water load less than that which would occur during the base flood; and
- The elevated portion of the building and supporting foundation system shall not be subject to collapse, displacement, or other structural damage due to the effects of wind and water loads acting simultaneously on all building components (wind and water loading values to be used are defined in Section III).

SECTION V: Certification

Signature below certifies: X Section III; Section IV

WAVELAND

NONCONVERSION AGREEMENT with

CITY OF WAVELAND, MISSISSIPPI

	This DECLARATION made this // day of // ("Owner") having an address at
	WITNESSETH:
	WHEREAS, the Owner is the record owner of all that real property located at designated in the Tax Records as
	WHEREAS, the Owner has applied for a permil to place a structure on that properly that has an enclosed area below the base flood elevation constructed in accordance with the requirements of Article No. 5, Section "B" paragraph 5 of the Waveland Floodplain Management Ordinance of Number
	325 and under Permit Number / 3 3 6 8
	WHEREAS, the Owner agrees to record this DECLARATION and certifies and declares that the following covenants, conditions and restrictions are placed on the affected property as a condition of granting the Permit, and affects rights and obligations of the Owner and shall be binding on the Owner his heirs, personal representatives, successors, future owners, and assigns. Hancock County
	UPON THE TERMS AND SUBJECT TO THE CONDITIONS, as follows: I certify this instrument was filed on 06-19-2012 09:58:28 AM
	1. The structure or part thereof to which these conditions apply is: and recorded in Deed Book 2012 at pages 6378 - 6378
	2. At this site, the Base Flood Elevation is feet above mean sea level, National Geodetics lar Vertical Datum.
	3. Enclosed areas below the Base Flood Elevation shall be used solely for parking of vehicles, limited storage, or access to the building. All interior walls, ceilings and floors below the Base Flood Elevation shall be unfinished or constructed of flood resistant materials. Mechanical, electrical or plumbing devices shall not be installed below the Base Flood Elevation.
	4. The walls of the enclosed areas below the Base Flood Elevation shall be equipped and remain equipped with openings as shown on the Permit.
	5. The jurisdiction issuing the Permit and enforcing the Ordinance may take any appropriate legal action to correct any violation. Any alterations or changes from these conditions also may render the structure uninsurable or increase the cost for flood insurance.
	6. A duly appointed representative of the City is authorized to enter the property for the purpose of inspecting the exterior and interior of the enclosed area to verify compliance with this Declaration. Such inspections will be conducted upon due notice to the Owner and no more frequently than once each year. More frequent inspections may be conducted if an annual inspection discovers a violation of the Permit.
	7. Other conditions:
